New Rules for Global Justice

Structural Redistribution in the Global Economy

**Edited by Jan Aart Scholte, Lorenzo Fioramonti
and Alfred G. Nhema**

“Over the last decades corporate globalization has imposed an economic system that has produced a world for the 1%, increased global injustice, and pushed the planet and societies to the brink. The ideas and proposals presented in *New Rules for Global Justice* have become an ecological and political imperative.”

–Vandana Shiva, recipient of the Alternative Nobel Prize – Right Livelihood Award

Today's globalised world means offshore finance, airport boutiques and high-speed Internet for some people, against dollar-a-day wages, used t-shirts, and illiteracy for others. How do these highly skewed global distributions happen, and what can be done to counter them? *New Rules for Global Justice* engages with widespread public disquiet around global inequality. It explores (mal)distributions in relation to country, class, gender and race, with international examples drawn from Australia to Zimbabwe. The book is action-oriented and empowering, presenting concrete proposals for 'new rules' in regard to climate change, corruption, finance, food, investment, the Internet, migration and more.

“Global redistribution should be an urgent priority. By showing us how it can be accomplished, this much-needed book should hasten that day. A compelling roadmap to a just future.”

– James Gustave Speth, former head of UNDP and Co-chair, Next System Project of the Democracy Collaborative

“To solve the urgent interlocking problems of climate change, world poverty, corruption, migration, food insecurity, intellectual property, international finance and money itself, New Rules for Global Justice are desperately needed. This book, produced by eminent researchers from four continents, gives us a brilliant, insightful and timely start.”

– Richard Wilkinson and Kate Pickett, bestselling authors of *The Spirit Level: Why Equality Is Better for Everyone*

“In its global distribution of authors as well as in its wide range of topics and strategies, this book is an extraordinary contribution to the worldwide discussion of change.”

– Göran Therborn, University of Cambridge
